

OSC GLOBAL

— A CIRI Company —

CSfC-ENABLED SECURE COMMUNICATIONS FOR NUCLEAR SECURITY ENTERPRISE

OSC Global connects federal customers with specialized operating companies that support complex mission requirements. Through an NSA-approved CSfC Integrator, OSC Global provides engineering, registration support, implementation, and sustainment for secure classified communications environments.

DON'T CHOOSE THE WRONG INTEGRATOR

WHY HIGH-CONSEQUENCE MISSIONS CHOOSE OSC GLOBAL

CYBERSECURITY & ZERO TRUST

Mission-aligned cyber resilience, secure architecture, and critical infrastructure protection.

OPERATIONAL RESILIENCE

Strengthen readiness across distributed and critical infrastructure environments with resilient, scalable solutions.

FEDERAL CYBER READINESS

Built for Zero Trust, EO 14028, BOD 23-02, CMMC 2.0, DFARS, NIST 800-171/172, FICAM, SCRIM, and PQC priorities.

OUR CSfC FOCUS: HIGH-LEVEL CAPABILITIES

COMMERCIAL SOLUTIONS FOR CLASSIFIED (CSfC)

Secure communications and classified access using NSA-approved commercial technologies and layered security architectures.

CROSS DOMAIN SOLUTIONS (CDS)

Policy-enforced data exchange across networks of differing classification levels to support secure mission collaboration.

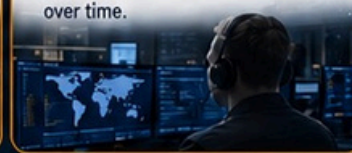

VIRTUAL DESKTOP INFRASTRUCTURE (VDI)

Secure virtual desktop environments that support controlled access, mobility, and multi-domain mission requirements.

O&M SUPPORT

Lifecycle support, sustainment, troubleshooting, updates, and engineering reach-back to help maintain secure operations over time.

OSC Global connects specialized operating companies to deliver mission-focused solutions. **OSC Edge executes CSfC capability delivery for secure communications environments.**

TRUSTED CSfC INTEGRATION

Design, engineering, registration, implementation, and accreditation support.

SECURE COMMUNICATIONS ENGINEERING

Scalable architectures for classified access and mission connectivity

LIFECYCLE O&M SUPPORT

Sustainment, updates, troubleshooting, and renewals.

Supporting Secure Communications for Federal Civilian, Defense, Intelligence, and Critical Infrastructure Missions

OSC GLOBAL

A CIRI Company

THE RIGHT CSfC INTEGRATOR REDUCES RISK.

SECURE COMMUNICATIONS. ENGINEERED CORRECTLY. SUSTAINED OVER TIME.

OUR CSfC ADVANTAGE

NSA-APPROVED CSfC INTEGRATION

Supports CSfC design, engineering, registration, implementation, and accreditation support aligned with NSA program requirements.

SECURE COMMUNICATIONS ENGINEERING

Enables scalable CSfC architectures for classified access, secure connectivity, and mission-specific operational requirements.

LIFECYCLE O&M SUPPORT

Provides sustainment, updates, troubleshooting, change management, renewals, and engineering reach-back to help keep CSfC environments operational over time.

CSfC SUPPORT AREAS

Focused support across the CSfC lifecycle.

OSC GLOBAL COMPANIES & SOLUTIONS

OSC Edge

A CIRI Company

Mission IT, Cyber, and
Cloud for National Security

OSC Edge ^{TECH}

A CIRI Company

Secure engineering, integration, classified
access solutions, and **OPTICA Security**.

OPTICA Security
is an offering
under OSC EdgeTech,
not a separate
company.

OSC TECHNICAL SOLUTIONS

A CIRI COMPANY

Security-Focused Engineering for the Nuclear
Security Enterprise and High-Consequence
Environments

I2X

TECHNOLOGIES

A CIRI COMPANY

Engineering-Led Mission Operations, Space,
Intelligence, and Defense Support

PROCUREMENT & TEAMING PATHWAYS

APPROPRIATE CONTRACTING PATHWAYS

Acquisition alignment depends on customer requirements, contract eligibility, and mission needs. Where applicable, contracting support may be aligned through the appropriate OSC Global operating company, including OSC EdgeTech.

FLEXIBLE TEAMING & EXECUTION

CSfC technical execution is supported through OSC Edge, with additional OSC Global operating companies engaged where appropriate to support contract and delivery requirements.
